

WHO ARE WE?

Aile Publishing is a publishing house founded by writer Hatice Kübra Tongar and publisher İsmail Tongar. Ömer Faruk Paksu is the publishing consultant and Ayşe Çetintaş is the editor of our books. Of course, dozens of our valuable illustrators, designers and writers accompany our excitement to create our content with their works.

WHY DO WE EXIST?

Because we care very much about the institution of family. We have been working to contribute to this institution for years. We accumulate words to say and projects that we deem necessary. Our age is full of arguments to discredit the family institution and to consume its power, and unfortunately, the family institution is negatively affected by this situation. We see a picture in which the age of marriage has risen above thirty, single-parent homes are rapidly increasing, existing families are struggling in the vortex of virtual communication, people who cannot speak, communicate, fill the day in the same room but in different worlds are increasing. We endeavour to change this picture in a positive way by working day and night. We love to lose sleep for children, for young people, for parents, to make a positive contribution to the future of the world.

WHAT ARE WE DOING?

We produce content that has a message and mission for every age group, not from 7 to 77, but from 0 to 99, that reinforces the institution of family and strengthens the bond between generations. From baby books to youth novels, from manga to children's literature, from educational books to psychology books, from games that increase quality time with the family to ageless books, we work day and night to prepare publications on every subject related to "Family".

Aile Publishing will bring a breath of fresh air to print and digital publishing. We will say that we are here to protect the institution of "Family" with our printed publications and digital publications and contents. Let's say this much: Get ready to see the phrase "the first in Turkey" in this publishing house.

Close your eyes and let time flow backwards like grains of sand in the desert. Let history go back one thousand five hundred years, let the calendar show the Age of Bliss, let our eyes turn to the peaceful home. Let the memories of our beautiful Prophet touch our hearts through the language of his family.

This book tells the story of Prophet Muhammad (PBUH) through the language of his grandfather Abdulmuttalib, father Abdullah, mother Amine, wet nurse Halime and beloved wife Khadija. The clocks turn back, history comes alive again and... "His family tell about him."

"My only grandchild, of whom I am proud to be a grandfather, whose birth enlightened my world. The one I can't get enough of, the one in whose eyes I see heaven..." A grandfather in his eighties, talking about his grandchild...

"I am Abdullah. Abdullah who was chosen as a sacrifice like his ancestor Ismail. Abdullah, who lived with the fate of his orphan Muhammad being called 'the son of two sacrifices' years later..." A father writing imaginary letters to the son he has never seen...

"That night I realized that the inside of my house was filled with light, that the sun had risen inside. A fragrance I had never smelled before was emanating from his skin." A mother talking about her orphaned child...

"As my soul left the cage of my body, all the memories of my life with Him flashed before my eyes one by one. Our first acquaintance, our marriage, our heavenly flowers blooming one by one, our offspring, our prayers, our first sajdah before Allah as husband and wife, our hand in hand thanksgiving..." A wife who talks about love, patience, sacrifice...

In an age where psychiatric diseases are increasing many times over, obesity due to inactivity has decreased to childhood, divorce rates are rising rapidly, and miscommunication within the family has become evident, it is time to get up from the screen and extend our hands holding the phone to the hands of our family, to look into the eyes of our spouses and children with the attention we watch TV series, to run to the soil and water to find our essence, in short, to be a “Family in Nature”!

The couple Elif-Eyüp Güvere, who have been organising contemplative walks, camps and nature activities for hundreds of families for years, are taking families on a journey through the lines of a book this time, and families are returning to their essence through Family in Nature.

“What does it mean to be in nature? What are the formulas of natural life as a family? How do we get rid of the shopping mall culture? How do we get young people off the screen? What can be done in the forest besides barbecue? What are the practical ways to make holidays and discoveries as a family?” You will find the answers to dozens of questions in this book.

Expert Psychologist Fatih Reşit Civelekoğlu warns husbands and wives: “Do not parent each other, be a companion!”

One of the most important requirements of marriage is a healthy sexual life. However, many couples cannot achieve a healthy harmony in their sexual life. In a husband-wife relationship where lust is forgotten, this important orientation is replaced by an unbalanced relationship of affection in which the spouses are almost like parents to each other. Such a relationship turns into “domesticity”, not “marriage”.

How should husband-wife harmony be?

How to increase lust between spouses?

How to solve sexual problems?

What is the right affection in a marital relationship?

How should romance and eroticism be experienced?

All the information that will turn all domestic relationships into a real marriage is in this book!

Well, my dear friend! Let me explain the rules of the game. Maybe you already know this game. If you don't, it's very easy and enjoyable. You'll learn it right away.

Here's how our game goes: I hold a place in my mind. And I say to you: "I have a place in my mind?" You ask for a clue. You say: "What kind of place is it?"

But it's not that easy! You might not guess it right away, not in the first question. Don't worry! Keep asking me: "What kind of place is it?"

The author of books beloved by millions of children and young people, Hatice Kübra Tongar, holds a place in her mind. Then, she tells the history of this place to the young people by giving them clues. Of course, without mentioning the name of the place! It's up to them to figure out where it is.

At the end of the book, the young people are in for a huge surprise.

So, let's ask right away: "What kind of place is it?"
